KEA bushing for tables.

The perfect solution for coffee and dining tables.

The KEA solution gives you the possibility to tighten and adjust your table leg in any position due to its **patented** internal spring-loaded system.

With a traditional bushing you normally reach a point where you cannot turn in the hangerbolt any further. If you then have a square table leg that has to be flush with the edge of the table you have a problem. Only by heavy force you can try to turn your table leg further and risk that the wood cracks.

This will not happen with the KEA bushing due to its **patented** internal spring-loaded system.

“RIMA” LEG CONNECTOR F/SQUARE LEGS

The “RIMA” leg connector gives you the possibility to tighten and adjust your leg in any position due to its patented internal spring-loaded system.

With a traditional bushing you normally reach a point where you cannot turn in the hangerbolt any further. If you then have a square leg that has to be flush with the edge of the furniture you have a problem. Only by heavy force you can try to turn your leg further and risk that the wood cracks.

This will not happen with the “RIMA” connector due to its patented internal spring-loaded system.

TWISTER - Конектор за мебелни крака

TWISTER - Конектор за мебелни крака

Конекторът за крака "Twister" е предназначен за поставяне на крака на всяко място с реглаж от 0 до 20 градуса, просто завъртате крака плътно върху плочата на съединителя.

Може да се използва на маси, шкафове, легла, дивани и гр. - където е нужен крак.

"Twister" дава възможност за промяна на дизайна на мебелите.

Освен това, при неравни подове може да се използва и като регулатор на височината.

Регулираем до 40 мм при смяна на ъгъла от 0 до 20 градуса. "Twister" е проектиран за максимален диаметър на крака 50 мм и болт М8.

Кръглата плъзгаща се плоча и тяло са изработени от черен армиран ABS.

Вътрешната част е изработена от стомана.

Датски дизайн от SISO & Jesper Møller Hansen.

CLICK CATCH INFO

Click Catch Innovative patented solution for connecting table and additional table leaves!

The connector consists of a male and female part – a revolving fork and a U-bracket.

Normally two sets of **CLICK CATCH** are mounted under separate table tops to connect a pair of tables by wedging the forks into the U-brackets. When not in

use the forks are easily swivelled back under the table top, where they remain invisible and of no obstruction to knees!

We supply a template for the correct location of fastening screws, but otherwise the positioning of the hardware is determined by the furniture manufacturer.

The hardware is manufactured from 3 mm har steel plate, bright zinc or yellow zinc plated. You can furthermore choose between 2 different lengths.

The standard model which is 153 mm long and a longer and even stronger model “XL” which is 201 mm.

The “XL”-model is especially popular for tables with chamfered plates.

We are also prepared to supply extra female parts of the **CLICK CATCH** in case clients want to offer their desks with more than one attachment position.

Originally the **CLICK CATCH** was created for connecting tables, but also modular chairs can be joined into sofas - and single beds into double beds - simply by applying the **CLICK CATCH** !

SURF

BREAKING THE TRADITIONS

SURF

the new patented solution for connecting tables

The **SURF** table connector is the latest development of our table connector CLICK CATCH.

With the **SURF** we combine design with improved functionality. Not only does the **SURF** connect and hold the table leaves like the CLICK CATCH - it also pulls the table leaves together.

The **SURF** is mounted under the table top to connect tables by sliding the ellipse into the female part. When connected, you lock and tighten the **SURF** by closing the black plastic locking cap.

When not in use the ellipse is easily swivelled back under the table top, where it remains invisible and of no obstruction to knees! The female part, when not in use, works like a spacer for safe stacking of additional table leaves.

Danish design by SISO & Jesper Møller Hansen

SURF - THE TABLE CONNECTOR

SURF PA6 – THE TABLE CONNECTOR

The SURF PA6 table connector is the second generation of our table connector SURF.

As the name indicates it is produced in polyamid material whereas the original SURF is made of zamak.

The function is the same but due to the choice of material the price is more affordable. It is however only available in black color.

CATCH # 22

Catch #22 is a patented version of the traditional table catch. This new model holds itself flat underneath the table top and spare leaves in both the locked and unlocked position.

Flat to base, even when unlocked - see picture A - D.

The old version always hung loose underneath the table and from spare leaves when not in use. This could easily cause damage to surfaces and edges, particularly on tables fitted with folding »butterfly« extension leaves and even to peoples' legs and clothing.
